EXPERTISE

Main Stack

Unity 2D/3D, C#

SKILL SET

Gameplay systems, prototyping, procedural generation, UX iteration

Unreal Engine 5, C++, Arduino-integrated interactive systems

QA, debugging, Git/GitHub, asset integration, Unity Animator, particle systems

EDUCATION

Tiltan College

Game Design & Programming
May 2024 - Present

Ort Leibovitch High School

Physics & Economics

LANGUAGES

Hebrew - Native

English - Fluent

CHEN SAYAG

Unity Developer | Game Developer

PROFILE

Unity developer with hands-on experience building gameplay systems, prototypes, and interactive installations in C#. Combines development, QA, and rapid iteration to ship responsive, polished player experiences.

EXPERIENCE

Berger Sisters - Unity Developer

Nov 2025 - Present

- Implemented Unity gameplay systems, player interactions, and feature logic across multiple 2D projects in active production.
- Built interactive content for real-world installations, including the Midbaryom Zoo experience in Beer Sheva.
- Tested, debugged, and refined gameplay flow to improve stability, usability, and release readiness.
- Integrated assets, animations, VFX, and Arduino-connected interactions through Unity production workflows.
- Collaborated with teammates and stakeholders to adapt features quickly during production and playtest feedback.

Bartender & Bar Manager

Apr 2021 - Nov 2025

- Managed bar operations, team coordination, logistics, and shift priorities.
- Delivered consistent service while balancing daily operations and team needs.

SELECTED PROJECTS

Night Of The Beasts [🔗](#)

- Built Unity gameplay systems and core implementation for a player-focused project.
- Focused on responsive interactions, iteration, and polished gameplay presentation.

Global Game Jam 2026 [🔗](#)

- Built a jam game under tight deadlines with collaborative design and rapid iteration.
- Delivered gameplay features while balancing scope, testing, and polish.

Procedural Dungeon Generator [🔗](#)

- Developed a Unity procedural dungeon system for dynamic level layouts.
- Designed for replayability, fast iteration, and readable gameplay spaces.

ADDITIONAL TRAINING FOCUS

Coursework and project work in game development, Unity C#, design patterns, teamwork, and production workflows.
